SUMMARY

AI Engineer and senior Python backend developer with 8+ years of experience shipping production systems end to end: data model, APIs, cloud infrastructure and LLM features. In 2026 built a RAG knowledge base with AI agents, an AI proposal generator and AI sales reporting for a real-estate marketing agency, and led the technical side of a licensed brokerage platform. M.Sc. Computer Science (Big Data & AI), SRH Berlin, 2026. Looking for a full-time AI/ML or backend role anywhere in Germany (remote, hybrid or on-site; open to relocation), with English as the working language.

TECHNICAL SKILLS

- **AI / LLM:** RAG (pgvector, embeddings), AI agents, MCP (Model Context Protocol), LLM evals, Claude, OpenAI, Gemini and Mistral APIs
- **Machine learning:** PyTorch, TensorFlow, scikit-learn, SVMs and kernel methods
- **Backend:** Python (FastAPI, Django, Celery, SQLAlchemy, Pytest), C# / ASP.NET Core, TypeScript, REST APIs, microservices
- **Data & messaging:** PostgreSQL, MySQL, MongoDB, RabbitMQ, Inngest background jobs
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, load balancers), GCP, Hetzner, Vercel, Docker, Kubernetes, Jenkins, GitHub Actions
- **Automation & integrations:** n8n, OAuth 2.0, Google Workspace, Slack, Notion, Canva Connect API, Fathom API, Stripe, PayPal
- **Frontend & mobile:** React, Next.js, Vue.js, Swift (iOS)

PROFESSIONAL EXPERIENCE

Software / Machine Learning Engineer — Unit AI (remote) Apr 2024 – present

- In 2026, built four AI products for a real-estate marketing agency client: a RAG knowledge base with AI agents, an AI proposal generator, AI sales reporting and a property-portal monitoring agent (details under Selected Projects).
- Built LLM evals for RAG and AI-agent features to measure and track answer quality.
- Built MCP (Model Context Protocol) integrations that give AI agents access to tools and data.
- Integrated OpenAI and Gemini LLM APIs for automated test-case generation and log analysis, cutting bug-triage time.
- Built a distributed task-processing system with Celery and RabbitMQ for concurrent test execution and large-scale data processing.
- Architected and ran cloud infrastructure on AWS and GCP: EC2, load balancers, PostgreSQL replication for high availability; deployed services with Docker and Kubernetes.
- Built n8n business automations, including social-media auto-posting and invoice-collection pipelines.
- Developed UI test suites for React and Vue.js apps and automated Android performance monitoring via ADB.

Full-Stack Developer — BeProTravel (Tel Aviv, Israel; remote) May 2022 – Apr 2024

- Built and integrated an ML model for personalised travel recommendations, increasing user engagement.
- Developed full-stack applications in C# / ASP.NET Core and Python APIs for the core travel platform.
- Built CMS tools for travel agencies and a Python CRM integrated with Telegram bots.
- Developed native iOS apps in Swift.

Full-Stack Developer — Bookinglane (San Francisco, USA; remote) Aug 2020 – Apr 2022

- Led a remote team of developers and increased delivery speed by at least 20%.
- Built the taxi reservation platform, driver app and manager dashboard (Python, Django, React, ASP.NET Core).
- Deployed backend services on AWS and integrated Stripe and PayPal payments.

- Developed native iOS apps in Swift for the driver and manager roles.

Software Engineer — IROKEZ (Bishkek, Kyrgyzstan) Dec 2018 – Aug 2020

- Built C# / ASP.NET and WCF services, REST APIs and HTML/JavaScript front ends; designed database schemas.

SELECTED PROJECTS

Client work for a real-estate marketing agency (2026)

AI Brain: company knowledge base with RAG and AI agents

- Built a private knowledge base and AI file manager: documents synced from Google Drive, Notion, Gmail and Slack, searchable through RAG chat and AI agents.
- Stack: Next.js 15 / React 19, PostgreSQL with pgvector, S3 storage, Claude for chat and agents, OpenAI embeddings, Inngest background jobs, role-based permissions.

AI Proposal Generator

- Turns sales-call transcripts (Fathom API) into a pre-filled proposal, then generates a branded PowerPoint deck.
- Imports the deck into Canva as an editable design and exports PDF via the Canva Connect API (OAuth 2.0 with PKCE); includes a template library with placeholders, AI-generated designs and proposal history.

AI sales-performance reporting (n8n)

- n8n workflows that build weekly call reports for inbound and outbound sales teams with AI analysis, store them in the knowledge base and email them to management.

Real-estate portal monitoring agent

- Collector that crawls property portals, deduplicates listings and runs as background jobs, with a Next.js dashboard and authentication.

Other projects

Zaman Invest: digital brokerage platform — Technical Director · zamaninvest.kg Jun 2026 – present

- Owned architecture and delivery for a licensed securities broker in Kyrgyzstan: public site with market quotes, client app (PWA) with online account opening and digital identity verification, and an internal back-office dashboard.

AILIMITS — Founder · suleimansultanov.com/projects/ailimits Mar 2026 – present

- Verification and audit layer that checks every action of an AI agent before it commits, for finance and back-office automation.

LawMinded AI — lawmindedai.com

- EU AI Act compliance platform: built the backend, API and a RAG-based legal assistant that answers with citations.

EDUCATION

M.Sc. Computer Science (Big Data & Artificial Intelligence) — SRH Berlin University of Applied Sciences Oct 2024 – Oct 2026

- Thesis, grade 1.5 (German scale, 1.0 = best): *Adaptive Hybrid Kernel SVMs: Dynamic Feature Weighting for Noisy, High-Dimensional IoT Healthcare Data* (evaluated on the OPPORTUNITY and CASAS datasets against SVM-RBF, linear SVM and static MKL baselines).

B.Sc. Computer Science — International University of Innovation Technology, Bishkek, Kyrgyzstan 2019

LANGUAGES & CERTIFICATIONS

- **Languages:** English (fluent), German (A2, actively learning), Russian (native), Kyrgyz (native)
- **Certifications:** Data Science: Foundations using R (Coursera), Python in Data Science (Coursera), C# Developer Course (Attractor School, Bishkek)
